Scope and Sequence

Unit & Title	Vocabulary & Concepts	Reading & Comprehension	Grammar in Context	Listening & Speaking	Technical Writing
Unit 1: The World of Work	Job description, employee, employer, workplace, responsibility, schedule, teamwork, supervisor, skills, experience, training, safety rules.	Understanding the World of Work: Texts about jobs, workplace roles, and the importance of teamwork and safe work environments	Present Simple: • Verb to Be (am/is/are) Action Verbs Describing facts, routines, and roles.	Talking About Jobs: Dialog between a supervisor and a new employee; conducting a workplace morning briefing.	Writing a Technical Report: Structuring workplace inspection headers, status of equipment, and daily maintenance tasks.
Unit 2: The Workplace	Office, laboratory (lab), desk, computer, printer, cabinet, meeting room, equipment, chair, shelf, manager, worker.	Workplace Safety and Productivity: Comparing administrative offices and technical/pharmaceutical labs; protective gear (gloves, goggles) and productivity.	Describing Locations & Existence: • There is (singular) / There are (plural). • Spatial Prepositions of Place (in, on, under, between, in front of).	Workplace Instructions & Orientation: Facility walk-through with a new employee (Sara). Formulating positive instructions and negative imperatives.	Describing a Workplace Layout: Writing organized descriptions of office/lab layouts using There is / There are, with prepositions and positive/negative instructions.
Unit 3: Technology Tools and Equipment	Router, network switch, server, workstation, firewall, cloud storage, compiler, debugger, API, interface, server room, networking equipment, software tools.	Technology in IT Workplaces: Reading texts describing networking equipment, software development tools, cybersecurity devices, and server room organization.	Singular and Plural Nouns Prepositions of Place • Describing the location of hardware and software equipment using There is / There are where appropriate.	Server Room Orientation: Identifying networking devices, describing software tools and their functions, participating in technical workplace dialogues, and discussing security procedures.	Writing about IT Systems and Equipment: Writing structured paragraphs describing networking devices, software tools, their functions, and equipment locations using appropriate technical vocabulary.

UNIT 1

THE WORLD OF WORK

- ▷ LESSON 1: Vocabulary in Context.
- ▷ LESSON 2: Reading Comprehension.
- ▷ LESSON 3: Grammar in Context.
- ▷ LESSON 4: Talking About Jobs + Writing a Short Job Description

UNIT 1

THE WORLD OF WORK

LEARNING OUTCOMES

▷ Vocabulary & Concepts

- Recognize and use key workplace terms such as: job description, employee, employer, responsibility, and supervisor.
- Understand technical and industrial concepts like safety rules, training, and equipment inspection.

▷ Reading

- Understand texts about different workplace environments like factories, offices, and hospitals.
- Identify the main ideas regarding job responsibilities and workplace cooperation.

▷ Grammar

- Use the **Present Simple** (*Verb to Be & Action verbs*) correctly in workplace contexts.
- Apply grammar rules to describe routines, facts, and job roles.

▷ Listening & Speaking

- Participate in a dialogue related to starting a new job and meeting a supervisor.
- Use professional language to discuss skills, experience, and team tasks.

▷ Writing

- Write a short technical report to describe workplace status and daily maintenance tasks using appropriate action verbs.

LESSON 1

Vocabulary in Context

Discuss

- What skills are important for success in the workplace?

Study the following table carefully, and then answer the questions.

Icon	Word / Phrase	Definition
	job description	a list of duties and responsibilities in a job
	employee	a person who works for a company
	employer	a person or company that gives jobs to workers
	workplace	the place where people do their jobs
	responsibility	a duty or task that a person must complete
	schedule	the time plan for work activities

Icon	Word / Phrase	Definition
	teamwork	working together with others to achieve a goal
	supervisor	a person who manages and guides workers
	skills	abilities that help someone perform a job well
	experience	knowledge or ability gained from doing a job
	training	learning the skills needed for a job
	safety rules	instructions that protect workers from danger

Vocabulary Practice

1. A list that explains the duties and responsibilities of a job is called a _____.
 - a) workplace
 - b) job description
 - c) training plan
 - d) work schedule
2. A person who works for a company or organization is called an _____.
 - a) employer
 - b) supervisor
 - c) employee
 - d) manager
3. A person or company that provides jobs for workers is known as an _____.
 - a) employer
 - b) employee
 - c) supervisor
 - d) customer
4. The place where people perform their jobs every day is called the _____.
 - a) workplace
 - b) schedule
 - c) office plan
 - d) project

5. A duty or task that a worker must complete is called a _____.
a) skill
b) responsibility
c) experience
d) schedule
6. The plan that organizes working hours and activities during the day is called a _____.
a) teamwork
b) schedule
c) safety rule
d) responsibility
7. When employees cooperate and work together to achieve a goal, this is called _____.
a) teamwork
b) training
c) experience
d) research
8. A person who manages workers and guides their work is called a _____.
a) employee
b) trainer
c) supervisor
d) employer

9. Abilities that help someone perform a job successfully are called _____.
a) experience
b) skills
c) schedule
d) safety rules
10. Knowledge or ability gained from doing a job over time is called _____.
a) experience
b) teamwork
c) responsibility
d) training
11. Learning new abilities that help someone perform a job better is called _____.
a) training
b) schedule
c) teamwork
d) employment
12. Instructions that help protect workers from accidents or danger are called _____.
a) job descriptions
b) safety rules
c) work plans
d) schedules

Vocabulary Practice: Exercise 2

B. Fill in the blanks with words from the following list.

job description - employee - employer - workplace - responsibility - schedule - teamwork - supervisor - skills - experience - training - safety rules

1. The manager prepared a weekly _____ to organize the workers' tasks.
2. An _____ provides jobs and pays workers for their work.
3. After many years in the factory, the technician gained a lot of _____.
4. Following _____ is necessary to protect workers from accidents.
5. Good _____ helps workers cooperate and complete tasks efficiently.
6. A new _____ started working at the company last week.
7. The _____ explains the duties and tasks required in a job.
8. One important _____ of a technician is maintaining the machines regularly.
9. The factory floor is the main _____ where technicians perform their work.
10. The workers received _____ to learn how to use the new equipment safely.
11. A _____ checks the workers' performance and guides them during the job.
12. Mechanics need strong technical _____ to repair machines correctly.

Understanding the World of Work

Read the following text, and then answer the questions:

Work is an important part of everyday life. People choose different jobs depending on their interests, skills, and education. Every job has a specific job description that explains the duties and responsibilities of the employee. This description helps workers understand what they must do in their roles.

Employees usually work in different types of workplaces such as factories, offices, farms, hospitals, or hotels. In every workplace, workers follow a schedule and complete tasks according to their responsibilities. Different workplaces may require different tools, equipment, and working conditions.

Communication is also important in the workplace because workers need to share information and cooperate with others. Teamwork is very important in most jobs. Employees often work together to complete projects, solve problems, and achieve company goals. A supervisor helps guide workers and ensures that everyone follows the workplace rules.

Training is another important part of the world of work. Many employees receive training to improve their skills and gain experience. This helps them perform their jobs more effectively and safely. Continuous learning allows workers to develop their abilities and advance in their careers.

Safety rules are also essential in many workplaces, especially in technical and industrial jobs. Workers must follow these rules to avoid accidents and protect themselves and others. By respecting safety rules, employees help create a safe and productive work environment

A. Complete the sentences

1. A job description explains the duties and _____ of a job.
2. Employees work in different types of _____ such as factories and offices.
3. Workers often cooperate through _____ to complete tasks.
4. Employees improve their abilities through _____ and experience.
5. In many jobs, workers must follow _____ to avoid accidents.

B. Choose the correct answer.

1. People usually choose jobs based on their _____.
 - a) hobbies only
 - b) interests, skills, and education
 - c) friends' opinions
 - d) family traditions
2. A job description explains the _____ of a job.
 - a) salary and holidays
 - b) duties and responsibilities
 - c) working hours only
 - d) company history

2. Employees can work in many places such as _____.
 - a) parks and beaches only
 - b) factories, offices, farms, hospitals, or hotels
 - c) schools only
 - d) homes only

3. Employees can work in many places such as _____.
 - a) parks and beaches only
 - b) factories, offices, farms, hospitals, or hotels
 - c) schools only
 - d) homes only

4. Teamwork helps employees _____.
 - a) avoid work
 - b) compete with each other
 - c) complete projects and solve problems
 - d) work alone

5. Why do many employees receive training?
 - a) To reduce working hours
 - b) To improve their skills and gain experience
 - c) To change their job quickly
 - d) To avoid responsibilities

6. Why are safety rules important in many workplaces?
 - a) To increase salaries
 - b) To avoid accidents and protect workers
 - c) To reduce teamwork
 - d) To change job descriptions

C. Answer the following questions

- 1.What does a job description explain?
- 2.Where do employees usually work?
- 3.Why is teamwork important in the workplace?
- 4.How can workers improve their skills?
- 5.Why are safety rules important?

Comprehension Tip

Understanding a Text about the World of Work

To understand a text about the world of work, start by **identifying the main idea of each paragraph**, such as job responsibilities, workplace environments, teamwork, or training.

Then **look for supporting details** that explain the main idea. These may include examples of workplaces, types of tasks employees perform, or reasons why training and safety rules are important.

Pay attention to **linking words** such as *also*, *such as*, *especially*, and *because*. These words help connect ideas and explain relationships between them.

Finally, **summarize each paragraph in one short sentence**. This will help you remember the key information and better understand how people work together in different workplaces.

LESSON 3

Grammar in Context

Read the following text:

Employees are important members of any organization. A technician is responsible for checking equipment and ensuring that machines work properly. Workers are part of a team, and teamwork is important for completing tasks successfully.

Many employees do different tasks during the workday. They do maintenance work, check machines, and follow safety procedures. A supervisor does regular inspections to make sure the work is done correctly.

Employees do not ignore safety rules because safety is essential in every workplace. Workers are responsible for their duties and they do their jobs carefully to avoid accidents.

.

Grammar Tip: Present Simple (Verb to Be & Action verbs)

We use the **present simple tense** to talk about facts, routines, and general situations.

1. Verb "To Be"

Examples:

- I **am** a technician.
- She **is** a supervisor.
- They **are** employees in the factory.

Negative:

- I **am not** a manager.
- He **is not** responsible for safety training.

Questions:

- **Are** you a new employee?
- **Is** she the supervisor?

2. Present Simple with Action Verbs

Examples:

- I **work** in a workshop.
- She **works** in a hospital.
- They **do maintenance tasks** every day.

Negative:

- I **do not work** on weekends.
- He **does not operate** this machine.

Questions:

- **Do** you work in a factory?
- **Does** she manage the team?

Practice Exercise

A- Choose the correct answer.

1. She _____ a technician.
a) am
b) is
c) are
2. They _____ in the maintenance department.
a) works
b) work
c) working
3. _____ you work in this company?
a) Does
b) Do
c) Are
4. He _____ responsible for safety training.
a) is
b) are
c) am

B- Find and Correct the Mistakes

Each sentence has **one mistake** in the use of **verb to be** or **verb to do**.

Find the mistake and write the correct sentence.

1. She **are** responsible for checking the machines every day.
2. They **is** employees in the maintenance department.
3. He **do** his work carefully to avoid mistakes.
4. We **is** part of the technical team in this company.
5. The supervisors **does not** check the equipment every morning.
6. I **is** a new employee in this factory.
7. The workers **does** their tasks according to the schedule.
8. She **do** not follow the safety rules at work.

LESSON 4

Talking About Jobs + Writing a Short Job Description

Listening and Speaking: Talking About Jobs

 Listen and read the following dialog, and then role-play:

Supervisor: Good morning. Are you the new employee?

Employee: Yes, I am. My name is Jack.

Supervisor: Welcome, Jack. What department do you work in?

Employee: I work in the maintenance department.

Supervisor: Do you have experience in machine repair?

Employee: Yes, I do. I also received technical training last year.

Supervisor: That is good. You will work with the team on equipment inspection today.

Employee: Thank you. I am ready to start.

Supervisor: Excellent. I will introduce you to the rest of the team during our morning briefing in ten minutes.

Employee: That sounds great; I am happy to meet the team.

Supervisor: Please make sure you wear your safety gear before we head to the workshop

Employee: Sure, I will definitely.

A. Answer the following questions

1. What is the name of the new employee and what is his job department?
2. What specific skill or experience does the supervisor ask about?
3. When and how did Jack prepare for this job before starting?
4. What is Jack's first task on his first day?
5. What must Jack do before he is allowed to enter the workshop?

B. Critical Thinking

1. Why does the supervisor ask about Jack 's experience even though he was already hired?
2. Why is a "morning briefing" important in a technical workplace?
3. What could happen if an employee ignores the "safety gear" rule?

C. Discuss: Work in Groups

1. Why is it important to introduce new employees to the whole team on the first day?
2. What information should a maintenance worker include in their "technical training" report?
3. Do you think "equipment inspection" is a good first task for a new employee? Why or why not?

Work with a partner and role play.

Student A: Ask questions about the job.

Student B: Answer using the present simple.

Example questions:

- What do you do at work?
- Where do you work?
- Do you work in a team?
- What responsibilities do you have?

Writing: Writing a Technical Report

Key Features of a Technical Report

1. A good workplace report should be clear, factual, and organized. It usually follows this structure:
2. **The Header (Introduction):** State the workplace location and the date of inspection.
3. **Status of Equipment:** Describe the current condition of the workplace or machines using **Verb to Be**.
4. **Daily Tasks Done:** Explain the routine actions completed by the team using **Present Simple action verbs**.

Useful Expressions

- **Starting the Report:** "Weekly Inspection Report..." / "Daily Maintenance Report..."
- **Describing Status:** "The equipment is safe..." / "The machines are in good condition."
- **Describing Routine Tasks:** "The team checks..." / "Technicians perform maintenance..."

Model Report

Weekly Inspection Report Workplace: Factory Floor **Date:** May 24

"Technicians do maintenance work every week. The equipment is safe and clean. We check the machines and fix any errors. The supervisor signs the report every morning."

Writing Task

Imagine you are a technician in a workplace (a factory, workshop, or laboratory). Write a short **Technical Report** (5–6 sentences) about your routine work.

Include:

- A clear header (Workplace and Date).
- The current status of the equipment (using *is/are*).
- At least three routine tasks completed by the team (using *Present Simple* action verbs).

UNIT 2

THE WORKPLACE

- ▷ LESSON 1: Vocabulary in Context.
- ▷ Lesson 2: Reading Comprehension.
- ▷ Lesson 3: Describing the Workplace.
- ▷ Lesson 4: Workplace Instructions

LEARNING OUTCOMES

▷ Vocabulary & Concepts

- Recognize and use key workplace vocabulary such as: office, laboratory, desk, equipment, printer, computer, cabinet, and meeting room.

▷ Reading

- Understand short texts describing workplaces such as offices and laboratories.

▷ Grammar

- Use **There is** and **There are** to describe places and objects in a workplace..

▷ Listening & Speaking

- Describe an office or lab using simple workplace vocabulary and correct grammar..

▷ Writing

- Write a short paragraph describing a workplace using **There is / There are**.

LESSON 1

Discuss

- What can you find in an office?
- Why is organization important in workplaces?

Study the following table carefully, and then answer the questions.

Icon	Word / Phrase	Definition
	Office	a place where people work at desks
	laboratory (lab)	a room used for scientific work and experiments
	Desk	a table used for working
	Computer	an electronic machine used for work
	Printer	a machine that prints documents
	Cabinet	a piece of furniture used for storing files

Icon	Word / Phrase	Definition
	meeting room	a room used for discussions and meetings
	Equipment	tools or machines used for work
	Chair	a seat for one person
	Shelf	a flat surface used to hold objects
	Manager	the person responsible for a workplace
	Worker	a person who works in a company or lab

Vocabulary Practice

Choose the correct answer from a, b, c, or d.

A _____ is used to print papers and reports. .1

- a) chair
- b) printer
- c) shelf
- d) cabinet

Scientists usually work in a _____. .2

- a) laboratory
- b) playground
- c) restaurant
- d) garage

The manager sits at a large _____. .3

- a) desk
- b) machine
- c) door
- d) window

A _____ is used to store important files. .4

- a) computer
- b) shelf
- c) cabinet
- d) meeting

5. Workers use a _____ to type reports and emails.
a) printer
b) computer
c) cabinet
d) helmet
6. A _____ is a place for team discussions.
a) meeting room
b) laboratory
c) office chair
d) corridor
7. The tools and machines in the lab are called _____.
a) equipment
b) books
c) uniforms
d) posters
8. There are many books on the _____.
a) shelf
b) printer
c) computer
d) desk

9. The _____ is responsible for the employees.
- a) worker
 - b) student
 - c) manager
 - d) visitor
10. Every office has desks and _____ for workers.
- a) helmets
 - b) chairs
 - c) gloves
 - d) boots

Workplace Safety and Productivity

Read the following text, and then answer the questions:

. The workplace is an important place where employees complete different tasks every day. Some people work in offices, while others work in laboratories. Every workplace should be clean, organized, and safe for all workers.

In an office, there is usually a manager's desk, computers, printers, cabinets, and meeting rooms. Employees use computers to write reports, send emails, and organize information. There are also chairs, shelves, and office supplies that help workers complete their jobs comfortably and efficiently.

Laboratories are different from offices because they contain scientific equipment and special tools. In a lab, workers often wear gloves, goggles, and lab coats to protect themselves. There are many machines and instruments that require careful handling. Employees must follow instructions to avoid accidents and keep the workplace safe.

Clear communication and teamwork are also important in every workplace. Workers often discuss projects, solve problems together, and share responsibilities. A supervisor or manager helps organize the work and ensures that everyone follows the rules correctly.

A clean and organized workplace improves productivity and helps employees feel comfortable. When workers respect workplace rules and cooperate with each other, they create a positive and successful work environment.

A. Complete the sentences

1. Employees complete different tasks in the _____ every day.
2. In an office, workers use computers to write reports and send _____.
3. Laboratories contain scientific equipment and special _____.
4. Workers wear gloves and goggles to _____ themselves.
5. Teamwork helps employees solve _____ together.

B. Choose the correct answer.

1. Why should workplaces be clean and organized?
 - a) To waste time
 - b) To improve productivity and safety
 - c) To reduce communication
 - d) To avoid teamwork

2. What can you usually find in an office?
 - a) Computers and printers
 - b) Helmets and fire extinguishers
 - c) Construction tools
 - d) Heavy machines only
3. Why do laboratory workers wear gloves and goggles?
 - a) To decorate the lab
 - b) To protect themselves
 - c) To clean the office
 - d) To carry furniture
4. What is the role of a supervisor?
 2.
 - a) To ignore workers
 - b) To organize work and ensure rules are followed
 - c) To leave the workplace early
 - d) To repair all machines alone
5. Teamwork is important because employees can _____.
2.
 - a) avoid responsibilities
 - b) work alone all the time
 - c) solve problems together
 - d) stop communication
6. What helps create a positive work environment?
 - a) Ignoring workplace rules
 - b) Poor communication
 - c) Cooperation and respect for rules
 - d) Working without organization

C. Answer the following questions

1. What do employees use computers for in the office?
2. Name three things found in an office.
3. Why are laboratories different from offices?
4. How do workers protect themselves in laboratories?
5. Why is teamwork important in the workplace?

Comprehension Tip

Understanding a Text about the Workplace

To understand a text about workplaces, first identify the type of workplace being described, such as an office or a laboratory. Then look for the main idea of each paragraph and the details that support it. Pay attention to workplace vocabulary such as desk, equipment, manager, and supervisor.

Look carefully at words that describe location and organization, especially structures using **There is** and **There are**. These expressions help describe what exists in a workplace.

Finally, summarize each paragraph in one short sentence. This will help you remember workplace vocabulary and understand how employees cooperate and work safely in different environments.

LESSON 3

Describing the Workplace

Read the following text, and then answer the questions:

The office is clean and well organized. There is a manager's desk near the window, and there are two computers on the desks. There is also a printer beside the cabinet. Employees work together in the meeting room to discuss projects and share ideas. The workers keep the office tidy and organized every day.

The laboratory is different from the office because it contains scientific tools and equipment. There are shelves with instruments and materials for experiments. There is a safety cabinet in the corner of the lab. Workers wear gloves and lab coats while working. They follow instructions carefully to keep the workplace safe and efficient.

Good organization is important in every workplace. Employees should keep their tools in the correct place and clean their work areas regularly. Teamwork and communication help workers complete tasks successfully and avoid problems.

Grammar Tip: There is / There are

We use **There is** and **There are** to describe places and objects in a workplace.

1. There is

Use **There is** with singular nouns.

- There is a printer in the office.
- There is a cabinet near the wall.
- There is a manager in the meeting room.

2. There are

Use **There are** with plural nouns.

- There are two computers on the desks.
- There are many tools in the laboratory.
- There are workers in the office.

Practice Exercise: Choose the correct answer

1. _____ a printer in the office.
a) There are
b) There is
c) There
2. _____ many instruments in the laboratory.
a) There is
b) There are
c) There
3. There is a cabinet _____ the corner of the room.
a) on
b) in
c) under
4. _____ two meeting rooms in the company..
a) There are
b) There is
c) There
5. There is a computer _____ the desk.
a) on
b) between
c) under

Find and Correct the Mistakes

1. There are a printer in the office.
(_____)
2. There is many tools in the lab.
(_____)
3. There are a manager near the meeting room.
(_____)
4. The computer is under the desk and the printer is between the desks.
(_____)
5. There is two chairs in the office.
(_____)

LESSON 4

Workplace Instructions

Listening and Speaking: Talking About Jobs

 Listen and read the following dialog, and then role-play:

Supervisor: Good morning. Are you the new employee?

Employee: Yes, I'm Sara.

Supervisor: Welcome. This is our office and laboratory.

Employee: It looks very organized.

Supervisor: There are computers in the office and there is special equipment in the lab.

Employee: I can see the safety cabinet near the door.

Supervisor: Good observation. Please keep the workplace clean and follow the instructions carefully.

Employee: I will follow all the workplace rules.

Supervisor: Don't leave tools on the tables, and don't enter the lab without permission.

Employee: Don't worry. I will be careful.

A. Answer the following questions

1. What is the name of the new employee?
2. What is there in the office?
3. Where is the safety cabinet?
4. What does the supervisor ask Sara to do?
5. Does Sara agree to follow the workplace rules?

B. Critical Thinking

Read and answer the following questions:

1. Why is it important to keep the workplace clean and organized?
2. Why does the supervisor tell Sara not to leave tools on the tables?
3. What could happen if workers enter the laboratory without permission?

Writing

Writing Tip: Writing about a Workplace

To write about a workplace, describe the place clearly using *There is* and *There are*. Mention the location of objects using prepositions such as *in*, *on*, *under*, *between*, and *in front of*. Use short and organized sentences to explain what people do in the workplace.

Model Paragraph

“Our workplace is very clean and organized. There is a computer on the desk and there are chairs in front of the meeting table. There is a cabinet between the windows. Workers use the laboratory carefully every day. Please follow the instructions and don’t waste materials.”

Writing Task

Write a short paragraph (5–6 sentences) about your workplace. Include:

- The type of workplace (office or laboratory)
- Things in the workplace using *There is* / *There are*
- At least two prepositions of place
- One positive instruction
- One negative instruction

UNIT 3

TOOLS AND EQUIPMENT

- ▷ LESSON 1: Vocabulary in Context.
- ▷ LESSON 2: Technology Tools and Equipment in IT Workplaces.
- ▷ LESSON 3: Devices in the Server Room.
- ▷ LESSON 4: A Tour of the Server Room and Security Instructions.

LEARNING OUTCOMES

▷ Vocabulary & Concepts

- Recognize and use key vocabulary related to IT and networking such as: server, router, workstation, API, debugger, cloud storage, compiler, network switch, firewall, and interface.

▷ Reading

- Understand short texts describing network equipment, software tools, and their basic functions in server rooms and IT departments.

▷ Grammar

- Use singular and plural nouns correctly and use prepositions of place to describe the location of hardware and devices..

▷ Listening & Speaking

- Name tech tools and equipment and describe their basic functions in simple sentences.

▷ Writing

- Write a short paragraph describing software tools and hardware components and their uses in a workplace.

LESSON 1

Vocabulary in Context

Discuss

- Which tools do workers use on farms?
- Why is every tool important in agricultural work?

Study the following table carefully, and then answer the questions.

Icon	Word / Phrase	Definition
	Tools (Software)	programs or applications that developers use to do specific tasks
	Equipment (Hardware)	machines or physical devices used to complete technical network operations
	server	stores data and provides services to other computers
	router	connects different networks and directs data traffic
	workstation	a powerful computer used for specialized technical work
	API	allows different software applications to communicate with each other

Icon	Word / Phrase	Definition
	debugger	finds and fixes errors (bugs) in software code
	cloud storage	saves and stores data securely on the internet
	compiler	translates programming code into computer language
	network switch	connects multiple devices together within a local network
	firewall	protects electrical and digital systems from cyber threats
	interface	the visual layout that allows users to interact with a system
	server room	a place for technical network and data work

Vocabulary Practice

Choose the correct answer from a, b, c, or d.

1. A _____ is used to connect different networks and direct internet traffic.
a) debugger
b) router
c) compiler
d) workstation
2. A _____ helps companies store and access large amounts of data over the internet.
a) cloud storage
b) network switch
c) debugger
d) interface
3. A _____ is used to protect a local network from hackers and security threats.
a) firewall
b) server
c) compiler
d) workstation
4. A _____ translates programming code into machine language.
a) router
b) cloud storage
c) compiler
d) network switch

5. A _____ is used to find and fix errors in code.
- a) debugger
 - b) server
 - c) network switch
 - d) firewall
6. A _____ connects multiple devices together within the same office or room.
- a) network switch
 - b) API
 - c) router
 - d) workstation
7. An _____ allows two different software programs to talk to each other.
- a) API
 - b) workstation
 - c) debugger
 - d) server
8. A _____ is a powerful computer used by software engineers for heavy tasks.
- a) workstation
 - b) network switch
 - c) firewall
 - d) compiler

9. IT engineers keep high-performance devices in a _____.
a) server room
b) laboratory
c) kitchen
d) workshop
10. A user interacts with an application through its visual _____.
a) interface
b) compiler
c) router
d) debugger

Technology Tools and Equipment in IT Workplaces.

Read the following text, and then answer the questions:

Networking equipment and software tools are very important in server rooms and IT departments. Workers use different tools to complete technical tasks safely and accurately. Every tool has a special function that helps tech professionals perform their jobs efficiently.

There are many software tools in development offices such as debuggers, compilers, and APIs. Software engineers use debuggers to find and fix coding errors. Compilers and APIs help developers build and connect programs accurately. Interfaces are used to help users navigate applications smoothly.

Large hardware equipment is also important in technical workplaces. High-performance workstations run complex code, while servers store and manage corporate data carefully. Routers and network switches are used in server rooms to connect machines and transfer data safely and with less effort. Tech workers must configure these machines correctly to avoid system failure.

Security equipment is important in networks too. Firewalls protect systems from external damage and cyber threats. IT specialists often use cloud storage to save files and back up corporate data safely.

Workers should keep cables organized and return diagnostic tools to their cases after use. Clean and organized server rooms help networks operate safely and efficiently.

Safety and data protection are very important when using devices and systems. Workers should follow security protocols carefully and check network connections before launching systems. Safe configurations help prevent cyber-attacks and data loss in technical workplaces.

Modern technology has improved the quality of tools and equipment used in tech industries. Many systems today are faster, more secure, and easier to operate. Employees receive training to learn how to use modern cloud networks correctly and efficiently. Continuous training helps employees improve their technical IT skills and work performance.

A. Complete the sentences

1. Network engineers use routers to connect different _____.
2. Debuggers are used to find and fix _____ in software code.
3. High-performance workstations help developers run complex _____ or code.
4. Firewalls protect digital and electrical _____.
5. Workers should secure data by saving it to the _____ after work.

B. Choose the correct answer.

1. Why are tools and equipment important in IT departments?
 - a) To waste time
 - b) To complete technical tasks
 - c) To decorate the office
 - d) To reduce teamwork

2. What equipment is used to store and manage corporate data centrally?
 - a) Server
 - b) Router
 - c) Interface
 - d) Compiler

3. What is the function of a debugger?
 - a) Measuring electricity
 - b) Finding and fixing errors in code
 - c) Lifting heavy machines
 - d) Connecting networks

4. What does a firewall do?
 - a) Shapes wood
 - b) Protects systems from cyber threats
 - c) Stores physical tools
 - d) Prints papers

5. Why should IT workers organize cables and servers?
 - a) To avoid system failure and accidents
 - b) To increase noise
 - c) To waste materials
 - d) To stop communication

6. Which device connects multiple computers inside the same room?
 - a) Network switch
 - b) Compiler
 - c) Debugger
 - d) API

C. Answer the following questions

- 1.What do network engineers use routers for?
- 2.What is the function of a compiler?
- 3.Why are firewalls important?
- 4.What does an API connect?
- 5.Why should technicians keep server rooms organized?

Comprehension Tip

Understanding a Text about IT Tools and Equipment

To understand a text about technology, first identify the names of the hardware equipment and software tools mentioned in the text. Then focus on their functions and how specialists use them in digital networks.

Pay attention to singular and plural nouns and prepositions because they help describe the number and location of equipment clearly.

Finally, summarize the function of each tech tool in one short sentence. This will help you remember technical IT vocabulary and understand workplace communication more effectively.

Devices in the Server Room

Read the following text:

The server room is clean and organized. There is a router on the desk, and there are two network switches near the server rack. Workers use the router to direct internet traffic. The network switches help workers connect multiple office computers.

There is a main server beside the wall, and there are workstations in the center of the room. Developers use these workstations to write and test code carefully. The software debugger is on the computer screen near the compiler interface, and there is a backup hard drive under the desk.

The router is in front of the main server, and the network switches are between the router and the workstation. Security experts use the firewall to block malicious files safely.

Good organization is important in server rooms. Network engineers should manage cables properly after setup and keep systems updated and safe.

Grammar Tip: Singular and Plural + Prepositions

We use the **Present Simple** to describe facts, routines, and the functions of IT equipment.

1. Singular and Plural

Use singular nouns for one thing.

- There is a router on the desk.
- There is a debugger open on the workstation.

Use plural nouns for more than one thing.

- There are two network switches in the rack.
- There are many workstations in the IT room.

2. Prepositions of Place

We use prepositions to describe the location of tools and equipment.

The toolbox is **under** the table.

- The hard drive is under the desk.
- The router is on the desk.
- The network switch is between the server racks.
- The server is in front of the wall.

Practice Exercise

A- Choose the correct answer.

1. _____ a main server near the wall.
 - a) There are
 - b) There is
 - c) There
2. _____ many workstations in the IT room.
 - a) There is
 - b) There are
 - c) There has
3. The application interface is displayed _____ the monitor.
 - a) on
 - b) between
 - c) under
4. _____ two network switches in the server rack.
 - a) There are
 - b) There is
 - c) There has
5. The backup device is _____ the server table.
 - a) under
 - b) between
 - c) on

B- Find and Correct the Mistakes

6. There are a sprayer on the workbench. (_____)
2. There is many tools in the toolbox. (_____)
3. There are a tractor near the wall.(_____)
4. The pruning shears is between the table. (_____)
5. There is two incubators on the shelf. (_____)

LESSON 4

Listening and Speaking

A Tour of the Server Room and Security Instructions.

 Listen and read the following dialog, and then role-play:

Supervisor: Good morning. Are you the new network technician?

Technician: Yes, I'm Ali.

Supervisor: Welcome. This is our main server room.

Technician: There are many networking devices and workstations here.

Supervisor: Yes. There is a main server near the wall, and there are network switches on the racks.

Technician: I can see a firewall interface beside the router configuration screen.

Supervisor: Good. Engineers use the firewall to protect our corporate network safely.

Technician: What is the function of the API tool?

Supervisor: It allows our software applications to communicate. Please monitor all system alerts during your shift.

Technician: I will follow the security instructions carefully.

A. Answer the following questions

1. What is the name of the new network technician?
2. Where is the main server located?
3. What do engineers use the firewall for?
4. What is the function of the API tool?
5. Does Ali agree to follow the security instructions?

B. Critical Thinking

1. Why is it important to know the function of each software tool?
2. Why should network engineers keep the server room organized and cool?
3. What could happen if a company's firewall is configured incorrectly?

Writing

Writing Tip: Writing about IT Systems and Equipment

To write about networking systems and equipment, mention the name of each hardware device or software tool and explain its basic function clearly. Use simple sentences and prepositions to describe where the components are located..

Model Paragraph

“Our server room is clean and organized. There is a router on the desk and there are network switches in the server rack. Engineers use routers to connect different networks. There is a strong firewall near the main server to block security threats. Employees save all software code to cloud storage after work.”

Writing Task

Write a short paragraph (5–6 sentences) about networking tools and equipment in an IT department. Include::

- Names of tech tools or devices
- The function of each tool
- Singular and plural nouns
- At least two prepositions of place

General Revision

Group 1: Vocabulary and Structure (Questions 1 - 19)

A. Choose the correct answer from a, b, c, or d:

1. A list that explains the daily duties, tasks, and responsibilities required in a specific farming job is called a _____.
a) work schedule
b) training plan
c) job description
d) workplace
2. A _____ is a machine used on modern farms to reap, thresh, and clean grain crops carefully.
a) combine harvester
b) printer
c) desk
d) pruning shears
3. The farm field is the main _____ where agricultural technicians perform their work every day.
a) schedule
b) responsibility
c) training
d) workplace
4. Agricultural technicians often use a _____ to supply water to dry crops and fields safely.
a) cabinet
b) computer
c) irrigation pump
d) mower

5. A new _____ started working in the agricultural maintenance department of the company last week.
- a) supervisor
 - b) employer
 - c) employee
 - d) manager
6. Workers must follow the farm _____ to protect themselves and avoid dangerous accidents in fields.
- a) safety rules
 - b) job descriptions
 - c) office supplies
 - d) training schedules
7. A _____ is a glass or plastic building used to grow delicate plants under controlled environmental conditions.
- a) toolbox
 - b) greenhouse
 - c) mower
 - d) seeder
8. She _____ a skilled laboratory technician in our agricultural school.
- a) am
 - b) is
 - c) are
 - d) be
9. There _____ many seeders and pruning shears in the main farm toolbox.
- a) is
 - b) are
 - c) am
 - d) has

10. The new agricultural supervisor _____ regular inspections in the greenhouse.
- a) does
 - b) is doing
 - c) do
 - d) are doing
11. There is a safety cabinet _____ the corner of the laboratory room.
- a) on
 - b) under
 - c) in
 - d) between
12. The technicians _____ work on weekends because the farm laboratory is closed.
- a) does not
 - b) are not
 - c) do not
 - d) is not
13. The sprayer is located _____ the tractor and the storage toolbox.
- a) on
 - b) between
 - c) under
 - d) in front
14. _____ you have enough experience to operate this modern combine harvester machine?
- a) Does
 - b) Is
 - c) Are
 - d) Do

B. Fill in the spaces using one of the words given:

(workplace - essential - equipment - teamwork - supervisor - improve)

15. Following safety rules is _____ to protect workers from accidents on the farm floor.
16. The school bought new scientific _____ for the agricultural chemistry laboratory.
17. Good _____ helps employees cooperate and solve complex technical problems together.
18. A technical _____ checks the workers' performance and guides them during the day.
19. Continuous training programs help technicians _____ their practical and agricultural skills.

Group 2: Reading Comprehension (Questions 20 - 27)

Read the following text, and then answer the questions:

Modern industrial technology has changed the world of work. Today, technology is very important in workshops, factories, and laboratories. Automated machines and tools help technicians complete daily tasks more quickly, safely, and efficiently.

In modern technical workplaces, employees use computers to control lathe machines and milling machines. This specialized equipment can shape metal, cut wood, and measure materials with high accuracy. Because these machines are fast and complex, continuous training is essential for all workers. Training helps employees understand how to operate modern tools correctly and how to handle them safely to avoid dangerous workplace accidents.

Organization and communication are also key factors in a successful work environment. Technicians work together as a team to maintain equipment and solve technical problems. A workshop manager or supervisor prepares the daily schedule and ensures that everyone follows safety rules. For example, workers must wear protective gear, such as safety glasses and gloves, before entering the production area. Keeping the workplace clean and organized improves productivity and protects everyone.

A. Answer the following questions:

20. Why do technicians use computers in modern workplaces?
21. What should workers do before entering the production area?
22. Do you think continuous training is useful for industrial workers?
Why / Why not?
23. Find a word from the passage that means: "the rate at which goods are produced or work is completed".
24. How can a supervisor ensure that the workplace remains safe and productive?

B. Choose the correct answer from a, b, c, or d:

25. The underlined word "**equipment**" in the text means:
 - a) offices and desks
 - b) tools and machines
 - c) schedules and plans
 - d) uniforms and clothes
26. The underlined word "**them**" in the second paragraph refers to:
 - a) computers
 - b) technicians
 - c) modern tools
 - d) accidents
27. According to the text, a clean and organized workplace helps to improve:
 - a) salaries
 - b) productivity
 - c) holidays
 - d) office supplies

A. Answer the following questions:

20. Why do technicians use computers in modern workplaces?
21. What should workers do before entering the production area?
22. Do you think continuous training is useful for industrial workers?
Why / Why not?
23. Find a word from the passage that means: "the rate at which goods are produced or work is completed".
24. How can a supervisor ensure that the workplace remains safe and productive?

B. Choose the correct answer from a, b, c, or d:

25. The underlined word "**equipment**" in the text means:
 - a) offices and desks
 - b) tools and machines
 - c) schedules and plans
 - d) uniforms and clothes
26. The underlined word "**them**" in the second paragraph refers to:
 - a) computers
 - b) technicians
 - c) modern tools
 - d) accidents
27. According to the text, a clean and organized workplace helps to improve:
 - a) salaries
 - b) productivity
 - c) holidays
 - d) office supplies

Group 3: Writing (Questions 28 - 40)

PART I: Complete the following dialogue:

An engineer is talking to a new technician at the industrial site.

- **Engineer:** Good morning. Welcome to our technical department. Are you the new technician?
- **Technician:** Good morning, Sir. Yes, (28) _____. My name is Tarek.
- **Engineer:** Nice to meet you, Tarek. What is your area of expertise?
- **Technician:** (29) _____. I have three years of experience in machine repair.
- **Engineer:** Excellent. Did you receive any specialized training recently?
- **Technician:** Yes, (30) _____ last year.
- **Engineer:** Perfect. There is an inspection routine today. Please make sure you wear your safety gear before heading to the workshop floor.
- **Technician:** (31) _____. I am ready to start right now.

PART II: Translation

** Translate into Arabic:*

32. Technical education plays an essential role in preparing skilled workers for the modern job market.

Answer:.....
.....

33. Circuit breakers and inverters protect electrical systems from damage and dangerous accidents.

Answer:.....
.....

** Translate into English:*

34. يعمل الفنيون معاً كفريق واحد لإصلاح الآلات وصيانتها بانتظام داخل الورشة الزراعية..

Answer:.....
.....

35. يجب على كل موظف اتباع تعليمات المشرف والحفاظ على نظافة مكان العمل لزيادة الإنتاجية.

Answer:.....
.....

PART III: Writing (Questions 36 - 40)

Write a short Technical Report (5-6 sentences) about a routine equipment inspection in your **workshop**.

Your report must include:

- A clear header (Workplace location and Date).
- The current status of the equipment using Verb to Be.
- At least three routine maintenance tasks completed by the team using Present Simple action verbs.

Draft (مسودة):

.....

.....

.....

Final Answer:

.....

.....

.....

.....

.....

.....

.....

.....

GLOSSARY

Unit	Word	المصطلح باللغة العربية
The World of Work	Software Development Life Cycle (SDLC)	دورة حياة تطوير البرمجيات
The World of Work	Agile Methodology	منهجية أجايل
The World of Work	Remote Collaboration	التعاون عن بُعد
The World of Work	Project Management	إدارة المشاريع
The World of Work	Freelancing	العمل الحر
The World of Work	Tech Support	الدعم الفني
The World of Work	Systems Analysis	تحليل النظم
The World of Work	Cloud Engineering	هندسة السحاب
The World of Work	Data Engineering	هندسة البيانات
The World of Work	IT Consulting	استشارات تقنية المعلومات
The Workplace	Data Center	مركز البيانات
The Workplace	Server Room	غرفة السيرفرات
The Workplace	Network Operations Center (NOC)	مركز عمليات الشبكة
The Workplace	Development Studio	استوديو التطوير
The Workplace	Tech Lab	المختبر التقني
The Workplace	Meeting Pods	منصات الاجتماعات
The Workplace	Cloud Infrastructure	البنية التحتية السحابية
The Workplace	Support Desk	مكتب الدعم
The Workplace	Hardware Workshop	ورشة الأجهزة
The Workplace	Testing Environment	بيئة الاختبار
Tools & Equipment	Server	خادم
Tools & Equipment	Router	راوتر / موجه
Tools & Equipment	Workstation	محطة عمل
Tools & Equipment	API	واجهة برمجة التطبيقات
Tools & Equipment	Debugger	مصحح الأخطاء
Tools & Equipment	Cloud Storage	تخزين سحابي
Tools & Equipment	Compiler	مترجم البرامج
Tools & Equipment	Network Switch	مبدل شبكة
Tools & Equipment	Firewall	جدار حماية
Tools & Equipment	Interface	واجهة
